

GADIGEPPA TEGGINAMANI

+91-8904262318 | gadigeppategginamani8@gmail.com | LinkedIn | github.com/pscyho | Bengaluru, Karnataka

EDUCATION

Sri Krishna Institute of Technology, Bangalore

Bachelor of Engineering in Electronics and Communications Engineering, VTU Belagavi

- Relevant Coursework: Embedded Systems, FPGA Design, Digital Electronics, Communication Systems

Bengaluru, Karnataka

Dec 2022 – May 2026

EXPERIENCE & TRAINING

Kennametal Shared Services Private Limited

Project Intern – Smart Tool 3

- Contributed to development of intelligent tooling solutions under the Smart Tool 3 project
- Gained exposure to industrial IoT and smart manufacturing systems

Bengaluru, India

Dec 2025 – Jun 2026

India Space Academy (ISA)

Winter Training Programme – Advance Drone Technology

- Completed training on UAV design, flight mechanics, drone navigation and control mechanisms
- Studied drone applications in defense, agriculture, and remote sensing domains

Online

Jan 2026 – Feb 2026

ROBO AI Industrial Training Program

Trainee – Robotics & Artificial Intelligence

- Built embedded systems integrating sensors, actuators, and microcontrollers for real-world applications
- Developed robot programming skills including pathfinding, obstacle avoidance, and sensor fusion

Oct 2025 – Nov 2025

45-Day Intensive Program

National Institute of Electronics & IT (NIELIT), Calicut

Embedded Systems Training – Chips to Startup Program

- Completed embedded C programming, peripheral interfacing, and microcontroller architecture training

May 2025

Government of India

TECHNICAL PROJECTS

I2C Protocol Implementation on FPGA | Verilog, FPGA, Hardware Design

- Designed and simulated I2C protocol on FPGA using Verilog; verified via testbenches and timing analysis

2025

Real-Time Weather Monitoring System | ESP32-C3, IoT, Cloud

- Built industry-level weather station with ESP32-C3, sensors, wireless data transmission and cloud connectivity

Jul 2025

Rural Empowerment Web Platform | Web Development, Social Impact

- Developed full-stack platform connecting Tier-3 village youth with education and government scheme resources

May 2025

Automatic Smart Parking Gate | Arduino UNO, IR Sensors, Automation

- Built automated parking toll system using Arduino UNO and IR sensors for vehicle detection

2023

ACHIEVEMENTS & COMPETITION SUCCESS

HackVyuha 2025: Selected among top finalists in state-level hackathon for innovative solution

Top 20 - e-Yantra Robotics (IIT Bombay) 2024-25: Ranked 17th among 760 teams with autonomous robot

Hardware Hackathon 1.0 (Aug 2025): Built functional hardware prototype

Manthan 2025: Represented SKIT at Federation of Industry event with business and technical proposal

TECHNICAL SKILLS

Programming Languages: C, C++, Python, Embedded C, Verilog

Hardware & Platforms: ESP32, Arduino, FPGA, ARM Microcontrollers, PlatformIO, IoT Devices

Embedded Systems: Firmware Development, I2C/SPI/UART, Sensor Integration, Real-Time Systems

Tools & Technologies: Git/GitHub, Linux, PCB Design, Digital Hardware Design, Cloud IoT

Soft Skills: Problem Solving, Team Leadership, Technical Communication, Rapid Prototyping

ADDITIONAL INFORMATION

Languages: English, Kannada, Hindi

Interests: Embedded Systems Innovation, Robotics, IoT, Open-Source Hardware
